

Rely on it.

Temporary pre-fabulous beach houses.

RENOLIT ALKORPLAN

Temporary design...

CHALLENGE

A lot of people take holidays at the seaside. In Holland they had the idea to develop a temporary holiday house park on the beach. During summer people can book a holiday beach house with a view overlooking the sea.

In the winter the beach houses are disassembled and the prefab components are stored for the next summer.

SOLUTION

Wooden sandwich panels functioned as a support for a glued fleece back RENOLIT ALKORPLAN membrane. The pre-fabricated roof parts were manufactured in the workshop of the roof installer.

These pre-fabulous beach houses with views over the North Sea are a big success and had a booking rate of 90% in the first year.
